Android Mobile Data Terminal & GPS GSM Tracker

©2015 MOTIA All rights reserved. MOTIA reserves the right to change product specification without notice.

We (MOTIA CO., LTD) have launched new models, iMDT6000 (Windows Embedded Compact 7/Android OS based Mobile Data Terminal) and RM-300 (IP67 GPS & 3G GSM Tracker) with 36 Months Warranty based on long term accumulated QC and RMA system.

iMDT6000 is Android Mobile Data Terminal based on Dual Core 1GHz processor, 7-inch screen. Various optional modules for Wi-Fi, Bluetooth, GSM and GPS are available to be integrated inside. And, superior internal antennas or external antennas for both 3G or LTE GSM/GPRS and GPS/Glonass can be supported optionally depending on vehicle environments.

RM-300 is high-value vehicle tracking device with IP67 waterproof sealing feature for reliable installation and durable operation. The rugged RM-300 can endure harsh conditions including dirt, mud, ice, sand, and rain. RM-300 has a unique feature that it supports 6-bands 3G GSM/GPRS frequencies available over the world with a high-sensitive GPS/Glonass performances based on superior internal antenna technology.

About all kind of your inquiry, we will response to it within 24~48 hours. Flee free to contact us or send us an email marketing@motia.co.kr
